WASTE MINIMISATION

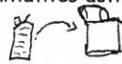

We have spent this session exploring Global Goal 12 with an aim to help support halving global food waste by 2030. We have been pulling together resources to highlight the scale of food waste in Scotland and to share tips on how to cut back on this type of waste. We hope that we can benefit our school, community and planet by spreading the message. We are still working on this and so it will continue into the next session.

ONGOING ACTIONS

The Eco Committee has continued to work hard to keep ongoing initiatives active.

These include:

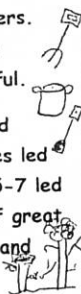

- Promoting recycling of paper, card batteries, ink cartridges and food
- RSPB bird watch week participation
- Creating bird rotas for feeding the birds and making bird food
- Bags to school
- Composting left over food from break and lunch

GARDEN TIDIES AND FOREST SCHOOLS

This session, we have continued with regular garden tidies, with the whole school involved and helped by parent volunteers. Our wildlife garden looks fabulous and very colourful.

P1-4 pupils have enjoyed Forest School experiences led by their teachers and P5-7 led by Julia Mackay. Lots of great skills have been learned and great fun had by all.

CLIMATE CHANGE

The Primary 5-7 class topic on "Our Global Footprint," supported the work of the Eco Committee and allowed the opportunity to raise awareness of the factors contributing to Climate Change. We discussed what we are doing already doing to help combat global warming and what further steps we can take. Posters of work done are displayed alongside the Eco display board for all to see.

GREENPOWER GOBLIN CAR

The Primary 5-7 class have enjoyed participating in the Greenpower challenge redesigning and improving our electric Goblin car and at the same time enhancing learning in Science, Technology, Engineering and Maths (STEM).
